🔍 Breakdown of Code:

◆ background-image:

Ek hi image file (sprite.png)

◆ background-position:

Image ke kaunse part ko dikhana hai (shift karke)

◆ width & height:

Har icon ka fixed size (jitna part dikhana hai)

□ Notes:

- Sprites tab useful hote hain jab **bahut saare chhote icons** chahiye
- Jo icons Photoshop ya Figma se milte hain, unko ek file me chipka do
