
📖 Chapter 10 – CSS Gradients: Rangon Ka Fusion 🌟

🎯 What is a Gradient?

Gradient = **Do ya zyada colors ka smooth mix**
Jahan ek color se doosra slowly blend hota hai.

Jaise **sunset sky** mein orange → pink → purple 😊
CSS me 2 type ke gradients hote hain:

1. **Linear Gradient** (Sidha line mein)
2. **Radial Gradient** (Gol gol center se)

◆ 1. Linear Gradient

Color change hota hai **straight line** mein (top → bottom, left → right, etc.)

✓ Syntax:

```
background: linear-gradient(direction, color1, color2, ...);
```

📦 Example 1: Top to Bottom

```
<div style="height: 150px; background: linear-gradient(to bottom, red, yellow);">
```

```
  ▼ Top to Bottom Gradient
</div>
```

Example 2: Left to Right

```
<div style="height: 150px; background: linear-gradient(to right, #00f, #0ff);">
```

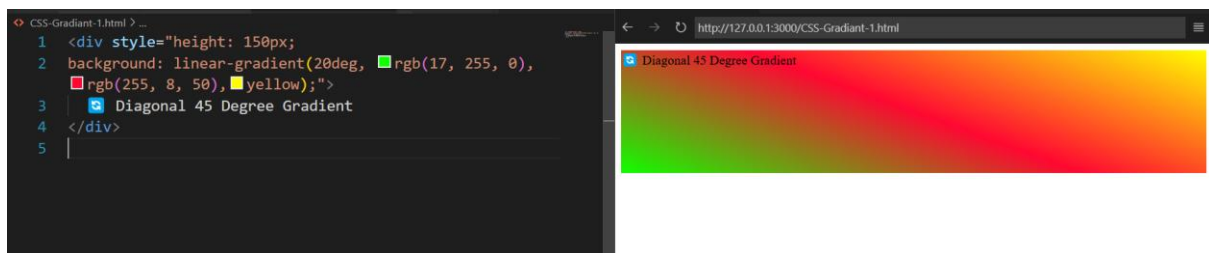

```
  ↻ Left to Right Gradient
</div>
```

Example 3: Diagonal Gradient

```
<div style="height: 150px; background: linear-gradient(45deg, purple, pink);">
```

```
  ↻ Diagonal 45 Degree Gradient
</div>
```

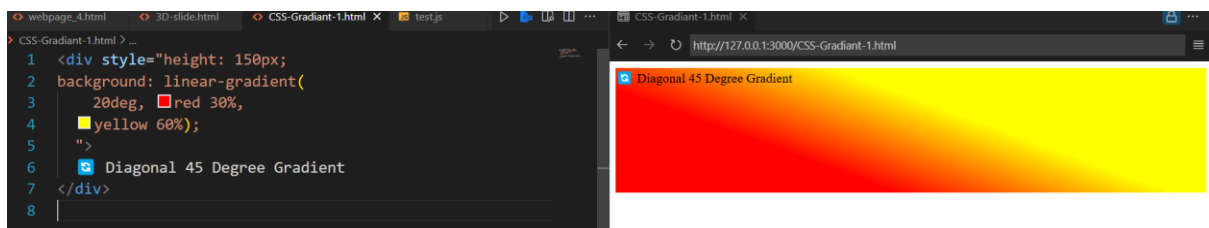

🎯 Color Stops – Gradient Me Rukawat Lagana

```
background: linear-gradient(to right, red 30%, yellow 70%);
```

❑ Matlab:

- Red: 0% to 30%
- Yellow: 30% to 100%

❑ 2. Radial Gradient

Color change hota hai **center se gol gol** shape mein

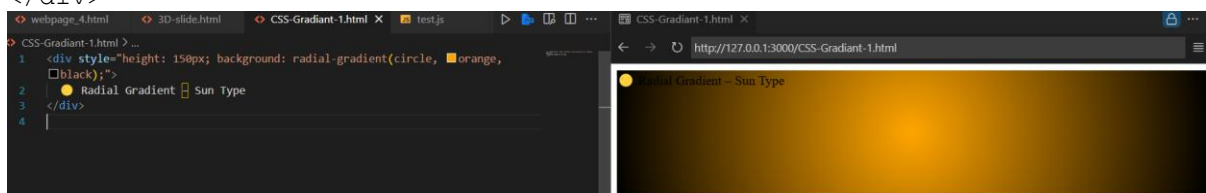

✔ Syntax:

```
background: radial-gradient(shape size at position, color1, color2);
```

❑ Example: Center Se Outward

```
<div style="height: 150px; background: radial-gradient(circle, orange, black);">
```

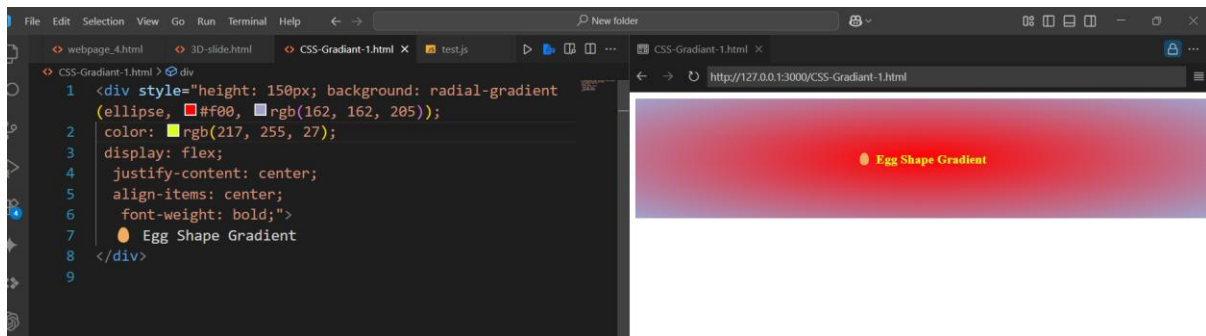

○ Radial Gradient - Sun Type
</div>

❑ Elliptical Gradient:

```
<div style="height: 150px; background: radial-gradient(ellipse, #f00, #fff);">
```

❑ Egg Shape Gradient
</div>

- Combine gradients with hover, text, or borders

★ Bonus: Gradient Button

```
<style>
.gradient-btn {
  background: linear-gradient(to right, #ff416c, #ff4b2b);
  padding: 10px 20px;
  border: none;
  border-radius: 30px;
```

```
    color: white;
    font-weight: bold;
    transition: 0.4s;
  }

  .gradient-btn:hover {
    background: linear-gradient(to right, #4facfe, #00f2fe);
  }
</style>

<button class="gradient-btn">🔥 Gradient Button</button>
```
