

✓ Task-1: CSS Animation Project (Student Assignment) –

📌 Task Title:

📄 **Animated Colorful Circles using HTML & CSS**

◆ Instructions (Student ke liye):

1. Ek web page design kijiye jisme **3 animated circles** side-by-side hoon.
2. Circles ka size **50px x 50px** ho aur unka background color alag-alag ho.
3. In circles par ek **CSS animation** apply kijiye jo:
 - Unko **rotate** kare
 - Unka size **scale** karke bada kare
 - Border ko **solid se dotted** me change kare
 - Aur background color bhi change ho
4. Animation ka duration **4 seconds** ho aur **infinite loop** me chalta rahe.
5. Saare circles ek **flexbox layout** me horizontally aligned hoon.

📌 Task-2: Stylish Animated Box using CSS Keyframes – Hinglish

◆ Task Title:

📄 **Box Animation with Rotation, Scaling, Shadow & Color Transitions**

Instructions ():

1. Ek web page banaiye jisme ek **animated square box** ho (ek single `<div>`).
 2. Box ka size **60px × 60px** ho aur iska starting background color **aqua** ho.
 3. Is box par ek CSS animation apply kijiye jiska duration **12 seconds** ho aur wo **infinite loop** me chale.
-

Animation Details (Using `@keyframes`):

- **10%:** Background color **violet** ho jaaye.
- **50%:** Box:
 - **-90° rotate** ho
 - **2.3x scale** ho
 - Border ho **2px dotted red**
- **70%:** Box:
 - Background color change ho kar **light skin tone** (e.g., `rgb(223, 201, 197)`) ho jaaye
 - **+90° rotate** ho
 - **3.3x scale** ho
 - **Box-shadow** lage (e.g., `2px 12px 12px red`)

Task-3: Animated Image-Box using CSS

◆ Task Title:

Image Background Animation with Rotation, Scaling & Effects

🔧 Instructions (Student ke liye):

1. Ek animated **image box** design kijiye using **HTML & CSS only**.
 2. Box ki size **60px × 60px** ho aur uska starting background ek image ho (use `background-image`).
 3. Animation ka naam "`ho`" ho aur wo **36 seconds** me chale — infinite loop me.
-

🎬 Animation Steps (Using `@keyframes ho`)

- **10%:**
 - Background color **violet** ho jaaye (temporary overlay)
- **50%:**
 - Box:
 - Rotate ho **-90°**
 - Scale ho **2.3x**
 - Box-shadow lage: `2px -12px 12px red`
 - Border lage: `2px dotted light green`
 - Background image change ho jaaye (2nd image)
- **70%:**
 - Box:
 - Rotate ho **90°**
 - Scale ho **3.3x**
 - Background image fir se change ho (3rd image)
 - Box-shadow aur bhi heavy ho jaaye — multicolor effect:
 - `blue shadow + yellow glow`

🛠️ Task-4: Multi-Box Image Animation using CSS

🎯 Task Title:

🔗 Create a Grid of Animated Image Boxes with Color and Transform Effects

🔧 Instructions (Student ke liye):

1. Ek webpage banao jisme total **4 square boxes** ho — 2 rows me (2x2 layout).
 2. Har box ka size ho **60px × 60px**.
 3. Har box ka initial background ho ek **image**:
 - `/pexels-ardit-mbrati-216809103-16439403.jpg`
 4. Har box par ek **CSS animation** apply karo (`@keyframes` ho) jo 6 seconds me chale aur **infinite loop** ho.
-

🌀 Animation Breakdown (`@keyframes` ho):

- **10%:**
 - Background color → **violet**
 - **50%:**
 - Background color → **tomato**
 - Box rotates **-90°** and scales **2.3x**
 - Border → `2px dotted light green`
 - Box-shadow → `2px -12px 12px red`
 - **70%:**
 - Background color → **yellow**
 - Rotation → **+90°**, Scale → **3.3x**
 - Box-shadow → `blue shadow + yellow glow`
 - **80%:**
 - Background color → **aquamarine**
 - Same transform and shadow as 70%
-

☐ Layout Requirements:

- Boxes should be arranged in **2 rows**, with **2 boxes in each row**

- Use **Flexbox** for layout (`.contr` class with `display: flex;`)
