
📖 Chapter 8 – Image Opacity: Transparent Ka Jadoo □

□ What is Opacity in CSS?

`opacity` ek CSS property hai jo element (jaise image, div, text) ko **transparent** banane ke liye use hoti hai.

Jaise WhatsApp status pe sticker faint dikhte hain – waise hi CSS me image ya text **halki** dikhayi de sakti hai 😊

† Syntax:

```
opacity: value;
```

✓ Value range:

- 1 = Fully visible (no transparency)
 - 0.5 = 50% transparent
 - 0 = Fully invisible
-

□ Example 1 – Image with Opacity:

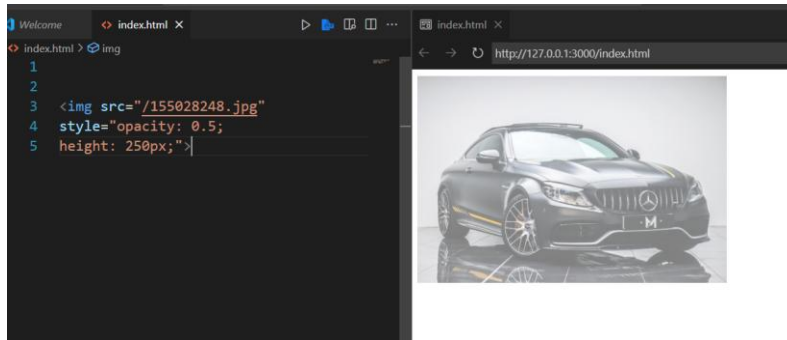

CODE ➔

[Clicke me](#)

```

```

□ Result: Image thodi **faint** dikhegi – jaise uspar dhund ho 😊👉

⚠ Important Note:

opacity lagta hai **poore element pe** — text, background, border sab transparent ho jaata hai.

🌀 Kaam Chalu Karne Wali Trick – Transparent Sirf Background:

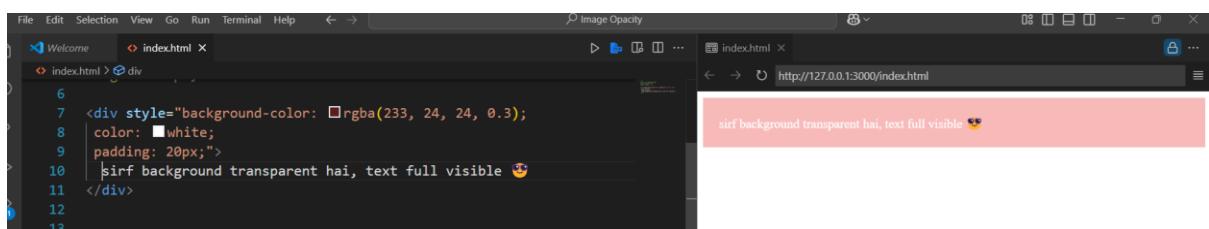

Agar sirf **background** transparent chahiye, aur content full dikhna chahiye toh `rgba()` ya `hsla()` use karo.

❏ Example 2 – Transparent Background Only:

```
<div style="background-color: rgba(0, 0, 0, 0.3); color: white; padding: 20px;">
```

Bhai sirf background transparent hai, text full visible 🤖

```
</div>
```

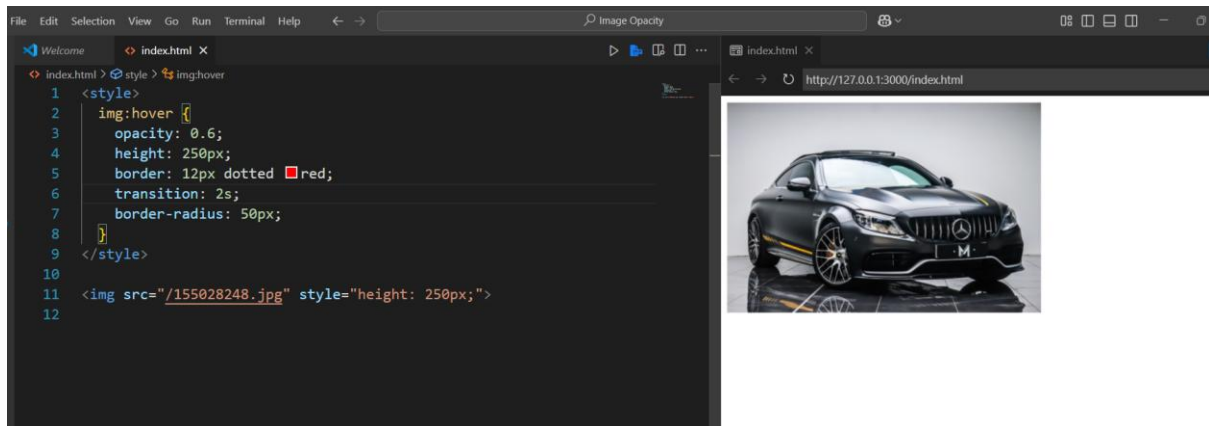

✓ rgba = red, green, blue, alpha (alpha = opacity)

🔍 Example 3 – Hover Pe Opacity Badalna (Stylish Effect)

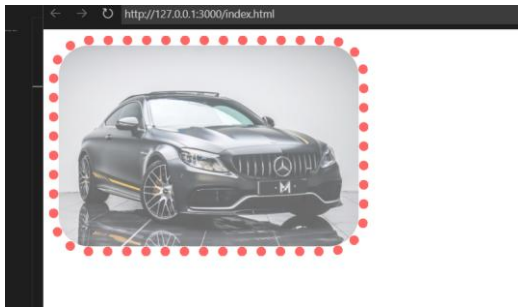

```
<style>
  img:hover {
```

```
        opacity: 0.6;
    }
</style>

```

After Hover →

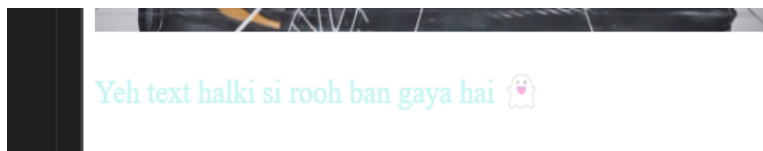

👉 Jab tum mouse le jaaye, tab image transparent ho jaayegi — stylish hover effect 😊

👻 Bonus – Text Pe Opacity

```
<p style="opacity: 0.3;">Yeh text halki si rooh ban gaya hai 👻</p>
```

```
File Edit Selection View Go Run Terminal Help
index.html > style > p
1 <style>
2   img:hover {
3     opacity: 0.6;
4     height: 250px;
5     border: 12px dotted red;
6     transition: 2s;
7     border-radius: 50px;
8   }
9
10  p{
11    opacity: 0.3;
12    color: turquoise;
13    transition: all 0.3s ease;
14  }
15
16  p:hover {
17    color: rgb(128, 255, 0);
18    opacity: 1;
19  }
20
21 </style>
22
23 
24
25
26
27 <p>Yeh text halki si rooh ban gaya hai 👻</p>
28
```

o/p ➡

After Hover ➡

Summary:

- opacity: 1 = Full visible
 - opacity: 0.5 = 50% transparent
 - opacity: 0 = Invisible
 - opacity pura element pe lagta hai
 - Background transparent chahiye = use `rgba (...)`
 - Hover effect me super stylish dikhta hai 🎨
-
